

Support for Creation

Support a la Creació (Support for Creation) is FiraTàrrega's programme of accompaniment and coproduction for street arts. It is focussed on contemporary aesthetics, hybridisation of artistic languages and fields and discovering talent. This is a place for creators to experiment with new focusses, stage formats and street dramaturgies and to research into artist-spectator relational theatre as well as in the participation of audiences in the creative processes.

The aims are the production, display and distribution of street-art shows, supplying the market with innovative and solid pieces, and encouraging their contracting in the national and international fields.

A public call is issued every year to select 5 (exclusively) street-art proposals that are in the creation and production phase, according to these objectives.
